CHANGE MANAGEMENT:
Structural Change – A Case Study in the Maldives

A thesis presented in partial fulfilment of the requirements for the
degree of

Masters
of
Educational Administration

at Massey University, Albany,
New Zealand.

Mizna Qasim

2007

Abstract

Changes to schools structure is a common practice in the Maldives. Structural change impacts on people at every level of the organisation. It is essential to identify how change is managed at different levels in schools in order to implement change successfully.

This study is based in a secondary school in the Republic of Maldives. This research examines the processes, school systems and practices, that facilitate change in structure. It seeks to understand how processes facilitate structural change at the various levels of school organisation, namely senior management (principal, assistant principals, supervisors), middle management (heads of departments) and teachers. In this inquiry, the structure selected to examine processes of change is the 'Organisation Chart'; in particular, changes to the roles and responsibilities of individuals.

To understand aspects involved in managing change, a review of literature focused on change and change management, leadership, structures of organisations, change agents and culture. This provided the researcher insight into the processes, aspects and issues in managing change.

A qualitative case study was undertaken for this research. A qualitative approach allowed the researcher to understand multiple realities, interpretations and perspectives of individuals associated with structural change. Data collection incorporated individual interviews, focus group discussions, document analysis and observations. Data was analysed using the, 'constant comparative method' (Merriam, 1998).

Evidence from this study suggests that equal attention needs to be given to the systems, change agents and culture of the school to facilitate and manage change.

Acknowledgements

I am indebted to the various people who have helped, supported and encouraged me in writing this thesis. Without them this thesis would not have been possible.

I would like to thank the New Zealand's International Aid and Development Agency (NZAID) for awarding me a scholarship to undertake my Masters degree. The scholarship provided me the means to do research in my home country, the Maldives, and explore an area of interest to me. I thank Massey University for selecting me as a capable applicant for the NZAID scholarship, and assisting me through the two years in New Zealand. I would also like to thank Vanessa van der Ham, learning advisor for postgraduate students for her comments on the thesis.

This research would not have been possible without the participating school and the participants. I thank the principal and participants for their time, thoughts and assistance during data collection. I would also like to thank Mohamed Fahmy Hassan and Ahmed Shareef Adam for their help during the data collection period.

My friends in Hamilton have been a great support for me throughout the two years in New Zealand. Especially, Afee, Shareef and their son Vazin provided great comfort for my kids while I was in the Maldives for data collection. I thank them all.

My first supervisor, Patsy Stringer, has been my mentor and greatest support in developing this thesis. Her commitment, strong intellectual focus, endless questioning and attention to detail have helped me to develop my thinking and knowledge in different areas of education. I would especially like to thank her for all the support and encouragement she provided through the ethics approval process. Professor Wayne Edwards honored me by offering to be my second supervisor. I appreciate all his comments, advice and support.

My family has always been my greatest strength in all my achievements. I would like to thank my mom, my greatest aspiration in life, for reminding me how important education is and providing me the guidance to be who I am today. My dad, who is always in my mind, reminding me of his love. My three great sisters, Naseema, Najma and Zeena, and my brother Ziyad, for their love and support. I would especially like to thank my sister and best friend Zeena for all her help at various stages of this thesis.

Finally, I would like to thank the three most important people in my life; my husband Maaz, my daughter Aisha and my son Akif. They make my everyday a joyful, happy and exciting one. Their endless smiles, laughter and love have made this long journey a blissful and memorable experience.
