A STUDY OF THE RESPONSES OF FOUR STRAINS OF MICE TO THREE  
DIFFERENT ENVIRONMENTS

BY

M.L. BIGHAM

Being a thesis submitted in partial fulfilment of the  
requirements for the Degree of Master of Agricultural  
Science of Massey University of Manawatu.

March 1965

#### ACKNOWLEDGEMENTS

The author wishes to express his appreciation to all the people who have given help and guidance to him during the course of this thesis.

Special thanks are due to Dr. F.C. Cockrem for his guidance and counsel given throughout the development and presentation of this thesis, and to Professor A.L. Rae, Dr. R.E. Munford and Dr. M.F. McDonald.

Thanks are also due to the Library staff for their assistance in getting the many references needed for this study.

## INDEX

	Page No.
Chapter I.	
Scope of the Investigation.	1
Chapter II.	
Review of Literature.	2
A. Introduction.	2
B. Physiological Aspects of Adaption to Cold.	3
I. Temperature Induced Changes.	3
II. Seasonal Induces Changes.	6
III. Behavioural Adaption to Cold.	7
C. Effects of Cold on Growth and Metabolism.	7
I. Body Growth.	
a. Temperature Induced Changes.	7
b. Seasonal Induced Changes.	8
II. Metabolism and Carcass Composition.	9
III. Strain Differences in Responses to Cold.	12
D. Body Growth & Metabolism in a Hot Environment.	13
E. Skin & Hair of Mice in Cold & Hot Environments.	14
I. Cold Induced Changes.	14
II. Seasonal Induced Changes.	17
III. Heat Induced Changes.	18
F. Body Temperatures in Hot & Cold Environments.	18
G. Tail Length & Body Weight Relationships.	20
H. Conclusions Drawn from the Survey of Literature.	
I. Adjustments to Cold.	21
II. Adjustments to Heat.	22
Chapter III.	
Materials & Methods.	23
A. Experimental Animals.	23
B. Methods.	24
I. Feed Intake.	24
II. Body Temperature Measurement.	24
III. Environments.	24
IV. Carcass Analysis.	25
C. Experimental Design.	25
D. Statistical Methods.	26
I. Analysis of Variance.	26
II. Covariance Analysis.	27
a. Introduction.	27
b. Procedure.	28
c. Interpretation of Results.	29
d. Presentation of Results.	29
Chapter IV.	
Preliminary Trials.	31
A. Introduction.	31
B. Experimental Design.	31
C. Results.	32
Chapter V.	
Results.	34
A. Introduction	34
B. Number of Mice Completing Treatments.	34
C. Results of Main Trial.	34

## Chapter V. (contd.)

Page No.

I.	Body Weights & Tail Lengths at the Start of the Treatments.	34
II.	Body Weights & Tail Lengths at the Finish of the Treatments.	35
a.	Analysis of Variance.	35
b.	Analysis of Covariance Adjusting for Initial Body Weight & Tail Length Respectively.	35
i.	Body Weight.	36
ii.	Tail Length.	36
iii.	Covariance Analysis of Tail Length at the Start & Finish of the Treatments Adjusting for Initial & Final Body Weight Respectively.	36
a.	Start of Treatments.	36
b.	Finish of Treatments.	37
III.	Body Temperature Results.	37
IV.	Body Weight & Body Temperature Analysis.	39
D.	Carcass Analysis Trial.	40
I.	Control Mice.	40
II.	Treatment Mice.	40
A.	Body Weight, Tail Lengths & Tail Weight.	40
i.	Analysis of Variance.	40
ii.	Covariance Analysis of Final Body Weight & Tail Length Adjusted for Initial Body Weight & Tail Length Respectively.	41
iii.	Growth Rates for Body Weight & Tail Length.	41
iv.	Covariance Analysis of Final Tail Length Adjusted for Final Body Weight.	42
v.	Covariance Analysis of Tail Weight Adjusted for Final Body Weight.	42
B.	Abdominal Fat & Total Body Fat.	43
C.	Pelt Weight & Hair Weight.	43
D.	Food Intake.	44

## Chapter VI.

	General Discussion.	46
A.	Body Weight & Tail Length.	46
B.	Body Temperature.	46
C.	Growth Rates.	47
a.	Body Weight.	47
b.	Tail Length.	48
D.	Tail Weight.	48
E.	Abdominal Fat & Total Body Fat.	48
F.	Hair Weight & Pelt Weight.	50
G.	Food Intake.	52

	Page No.
Chapter VII.	
Final Discussion.	54
A.    Adaptation to Cold.	54
B.    Adaptation to Heat.	56
Chapter VIII.	
Summary.	59
Chapter IX.	
Bibliography.	61

LIST OF TABLES.

Face Page No.

## Table.

I.	Metabolic responses of two strains of mice to two different environments.	12
II.	Response of body temperature in mice during activity as compared to body temperatures of inactive mice.	19
III.	Means and variances for body temperatures at hourly intervals.	32
IV.	Analysis of variance for body temperatures.	32
V.	Means and variances for body temperatures on days 1, 4, 9, 10, 15 and 16.	32
VI.	Analysis of variance for body temperatures on days 1, 4, 9, 10, 15 and 16.	32
VII.	Number of mice in each subgroup completing the treatments and number of mice dying.	34
VIII.	Means and variances for body weight and tail length at the start of the treatments for all mice completing the treatments.	34
IX.	Analysis of variance for body weight and tail length at the start of the treatments for all mice completing the treatments.	34
X.	Mean body weight of all mice dying.	34
XI.	Chi Square analysis for mice dying in the cold treatments.	35
XII.	Means and variances for body weight and tail length at the finish of the treatments.	35
XIII.	Analysis of variance for body weight and tail length at the finish of the treatments.	35
XIV.	Mean body weight at the finish of the treatments for all subgroups estimated by fitting constants.	36
XV.	Covariance analysis for final body weight adjusted for initial body weight.	36
XVI.	Covariance analysis for final tail length adjusted for initial tail length.	36
XVII.	Covariance analysis for initial tail length adjusted for initial body weight and final tail length adjusted for final body weight.	37
XVIII.	Mean tail length of all subgroups after adjusting tail length to an initial and final body weight of 12.0grms. and 20.0grms. respectively.	37
XIX.	Means and variance for body temperatures during the treatments.	38
XX.	Analysis of variance for body temperatures in the medium environment.	38
XXI.	Analysis of variance for body temperatures in the three treatments.	38

XXII.	Mean body temperature for each subgroup estimated by fitting constants (Period III unadjusted means due to the presence of interaction.	38
XXIII.	Mean body temperature for all mice dying.	39
XXIV.	Covariance analysis of mean body temperature over the last ten days of the treatments adjusted for final body weight.	39
XXV.	Means and variance for body weight, tail length, tail weight, pelt weight and abdominal fat and weight of total body fat for control mice.	40
XXVI.	Analysis of variance for body weight, tail length, tail weight, pelt weight, weight of abdominal fat and weight of total body fat for control mice.	40
XXVII.	Covariance analysis for tail length, tail weight, pelt weight, weight of abdominal fat and weight of total body fat adjusted for body weight.	40
XXVIII.	Mean and variances for weight of hair for control mice.	40
XXIX.	Analysis of variance for weight of hair for control mice.	40
XXX.	Covariance analysis for weight of hair adjusted for body weight for control mice.	41
XXXI.	Mean weight for tail length, tail weight, pelt weight, hair weight, weight of abdominal fat and weight of total body fat adjusted to a body weight of 13.0grms.	41
XXXII.	Means and variances for body weight and tail length at the start of the treatments and body weight, tail length and tail weight at the finish of the treatments.	41
XXXIII.	Analysis of variance for body weight and tail length at the start of the treatments.	41
XXXIV.	Analysis of variance for body weight, tail length and tail weight at the finish of the treatments.	41
XXXV.	Covariance analysis for final body weight adjusted for initial body weight.	41
XXXVI.	Covariance analysis of final tail length adjusted for initial tail length.	42
XXXVII.	Mean body weight and tail length for all subgroups on days 1, 2, 3, 6, 9, 15 and 21.	42
XXXVIII.	Covariance analysis for final tail length adjusted for final body weight.	42
XXXIX.	Covariance analysis for tail weight adjusted for final body weight.	42

Table.		Face Page No.
XXXXI.	Means and variances for weight of total body fat and weight of abdominal fat.	43
XXXXII.	Analysis of variance for weight of total body fat and weight of abdominal fat.	43
XXXXIII.	Covariance analysis of total body fat adjusted for body weight.	44
XXXXIV.	Covariance analysis of individual strains for total body fat adjusting for body weight.	44
XXXXV.	Covariance analysis of weight of abdominal fat adjusted for body weight.	44
XXXXVI.	Means and variances for the weight of pelt and weight of hair for all subgroups.	44
XXXXVII.	Analysis of variance for pelt weight and hair weight.	44
XXXXVIII.	Covariance analysis of pelt weight adjusted for body weight.	45
XXXXIX.	Covariance analysis of hair weight adjusted for body weight.	45
L.	Amount of food consumed by the five mice in each of the subgroups.	45
LI.	Analysis of variance for amount of food consumed.	45.
LI.	Amount of food consumed by the five mice, total body weight gain, and amount of food consumed per gram body weight gain for each subgroup.	45

LIST OF FIGURES.

Face Page No.

Figure.

I.	Metabolic vs. insulative acclimation to cold.	2
II.	Theoretical acclimation to high temperatures.	3
III.	Four possible regression settings for body weight and tail length relationships.	29
IV.	Body temperatures for three strains of mice at hourly intervals.	32
V.	Body temperatures for the four strains on day 1, 4, 9, 10, 15 and 16.	32
VI.	The relationship between final body weight and initial body weight.	36
VII.	The relationship between final tail length and initial tail length.	36
VIII.	The relationship between initial tail length and initial body weight.	37
IX.	The relationship between final tail length and final body weight.	37
X.	Body temperatures for four strains of mice during the treatments.	37
XI.	Body temperatures for mice in the medium treatment groups for the four periods.	38
XII.	Mean body temperatures of all subgroups for the four periods.	38
XIII.	The relationship between mean body temperature over the last ten days of the treatments and final body weight for all subgroups.	39
XIV.	The relationship between tail length, tail weight, pelt weight, weight of abdominal fat and weight of total body fat with body weight for the control mice.	40
XV.	The relationship between final body weight and initial body weight for all subgroups.	41
XVI.	The relationship between final tail length and initial tail length for all subgroups.	41
XVII.	Mean body weight for all subgroups on days 1, 2, 3, 6, 9, 15 and 21 for all subgroups.	42
XVIII.	Mean tail length for all subgroups on days 1, 2, 3, 6, 9, 15 and 21 for all subgroups.	42
XIX.	The relationship between final tail length and final body weight for all subgroups.	42
XX.	The relationship between tail weight and final body weight for all subgroups.	42
XXI.	The relationship between total body fat and final body weight for all subgroups.	43
XXII.	The relationship between weight of abdominal fat and final body weight for all subgroups.	43
XXIII.	The relationship between pelt weight and final body weight for all subgroups.	44
