A STUDY OF SOME ASPECTS OF REPRODUCTION IN

ROMNEY AND ROMNEY-CHEVIOT HALFBRED

TWO-TOOTH EWES

by

I.J. INKSTER

Being a thesis presented in partial fulfillment
of the requirements for the
degree of M. Agr. Sc.

Massey Agricultural College,
University of New Zealand.

May, 1953.

A C K N O W L E D G E M E N T S .

The writer wishes to express his gratitude to members of the Massey Agricultural College staff for the help which he has received from them during this investigation.

Special thanks are due to his supervisors, Professor A.L. Rae and Mr. R.A. Barton; to Mr. W.R.R. Hewitt and his farm staff; to Miss M.G. Campbell and her staff; to Miss J. Will; to Mr. T.S. Chiang; and to Mr. J.A. Carnahan.

TABLE OF CONTENTS.

	<u>Page</u>
 <u>CHAPTER I</u> - INTRODUCTION.	
I	DEFINITION OF THE SUBJECT 1
II	AGRICULTURAL SIGNIFICANCE OF THE PROBLEM 2
III	EARLIER INVESTIGATIONS OF FERTILITY DIFFERENCES IN SHEEP 3
IV	OTHER RELEVANT INVESTIGATIONS INTO LEVEL OF FERTILITY 6
V	POSSIBLE AGRICULTURAL SIGNIFICANCE OF THE PRESENT INVESTIGATION 7
 <u>CHAPTER II</u> - NATURE AND SCOPE OF STUDY. 9	
I	THE BEHAVIOUR OF EWES IN THE PRESENCE OF A RAM 12
II	THE STUDY OF FERTILITY 12
 <u>CHAPTER III</u> - EXPERIMENTAL MATERIALS AND MANAGEMENT 14	
I	THE EXPERIMENTAL AREA 14
II	THE EXPERIMENTAL ANIMALS 14
	(a) The ewes.
	(b) The rams.
	(c) The teasers.
III	MANAGEMENT OF EXPERIMENTAL ANIMALS 16

<u>CHAPTER IV</u> - THE BREEDING BEHAVIOUR OF		
	ROMNEY AND HALFBRED TWO-TOOTH	
	EWES BETWEEN MID-FEBRUARY AND	
	THE END OF MAY.	18
I	GENERAL INTRODUCTION	18
II	METHOD OF STUDY	18
A.	ONSET OF THE BREEDING SEASON	20
	Introduction	
	Method of Study	
	Results and Discussion	
	(i) Detection by vaginal smear	
	technique.	
	(ii) Detection by the use of	
	vasectomized rams.	
B.	THE SIGNS AND INTENSITY OF OESTRUS	32
	Introduction	
	Method of Study	
	Results and Discussion	
C.	DURATION OF OESTRUS	43
	Introduction	
	Method of Study	
	Results and Discussion	
D.	THE LENGTH OF THE OESTRUAL CYCLE	51
	Introduction	
	Method of Study	
	Results and Discussion.	
III	GENERAL DISCUSSION	59
IV	SUMMARY	61
<u>CHAPTER V</u> - A STUDY OF THE FERTILITY OF ROMNEY		
	AND HALFBRED EWES	63
I	INTRODUCTION	63
II	THE EXPERIMENTAL ANIMALS - THEIR	
	MATING AND SLAUGHTER	6

CHAPTER V (CONTD.)

A.	THE NUMBER OF OVA SHED	67
	Introduction	
	Method of Study	
	Results and Discussion	
	(i) The weight of the ovaries.	
	(ii) The ovulation rate.	
	(iii) The development of Graafian follicles.	
	(iv) The weights of the pituitary gland.	
B.	THE CONCEPTION RATE	74
	Introduction	
	Results and Discussion	
C.	THE MAXIMUM POTENTIAL LAMBING PERCENTAGE	83
	Introduction	
	Results and Discussion	
III	GENERAL DISCUSSION	86
IV	SUMMARY	91

<u>CHAPTER VI</u> -	STUDIES ON THE GENITAL TRACTS OF SLAUGHTERED EWES	93
I	INTRODUCTION	93
II	METHOD	93
III	RESULTS AND DISCUSSION	96
	Measurement of the genital tracts of pregnant ewes.	
	The genital tracts of non-pregnant ewes.	
	The crown-rump measurements of the foetus.	
IV	GENERAL DISCUSSION	107
V	SUMMARY	108

<u>CHAPTER VII</u> -	SUMMARY AND CONCLUSIONS	110
----------------------	-----------------------------------	-----

<u>REFERENCES</u>	114
-----------------------------	-----

<u>APPENDIX</u>	118
---------------------------	-----

LIST OF TABLES

<u>TABLE</u>	<u>Page</u>
I. Mean Live-weights of Romney and Halfbred Ewes During the Experimental Period	16
II. Analysis of Variance for Changes in Live-weight of Romney and Halfbred Ewes During the Experimental Period	17
III. Number of Oestral Periods Experienced By the Ewes of Group C	26
IV. Distribution of Times of Appearance of Mucus Relative to the Onset of Oestrus in 22 Oestral Periods.	27
V. Time of Appearance of the Metoestral Smear Relative to the Time of Onset of Oestrus .	28
VI. Distribution of Dates of Onset of the Breeding Season	31
VII. Mean Dates of Onset of the Breeding Season of 60 Halfbred Ewes and 54 Romney ewes . .	31
VIII. Distribution of Patterns of Heat Intensity in 123 Romney and 166 Halfbred Oestral Cycles	37
IX. Analysis of Intensity of Oestrus of Ewes at First Observation of Oestrus	38
X. Analysis of Intensity of Oestrus of Ewes at Last Observation of Oestrus	38
XI. Numbers of Oestral Periods which Contain at least One "High Intensity" Rating	39
XII. Relation of Time of Day to the Onset of Oestrus	41
XIII. Duration of Oestrus - Frequencies within Breeds	48
XIV. Mean Durations in Hours of 321 Oestral Periods	50
XV. Duration of Oestral Cycle - Frequencies Within Breeds	54
XVI. Mean Length of Oestral Cycle	55
XVII. Correlation Between Duration of Oestrus and the Length of the Oestral Cycle	57

<u>TABLE</u>	<u>Page</u>
XVIII.	Correlation Between the Duration of Oestrus and the Interval Before a Following Oestrual Period 58
XIX.	Mean Weights of 108 Ovaries from Romney and Halfbred Pregnant Ewes 70
XX.	Mean Ovulation Rate in 25 Romney and 29 Halfbred Pregnant Ewes 71
XXI.	Total Number of Graafian Follicles larger than 4 mm. diameter in Ovaries of Pregnant Romney and Halfbred Ewes . 72
XXII.	Mean Weights of the Vacuum Dessicated Pituitaries of 23 Romney and 26 Halfbred Ewes 74
XXIII.	Conception Rates at the First and Second Services of Romney and Halfbred Ewes . . 75
XXIV.	Breeding Histories of 12 Barren Romney Ewes of Group A 76
XXV.	The Maximum Potential Lambing Percentage of the Romney and Halfbred Ewes of Group A 84
XXVI.	Summary of Indices of Fertility 86
XXVII.	Measurements of the Genital Tracts of 22 Halfbred and 25 Romney Pregnant Ewes 98
XXVIII.	Mean Measurements of the Genital Tracts of 12 non-pregnant Romney Ewes101
XXIX.	Test of Significance of Deviations from Error Linear Regression104
XXX.	Tests of Significance of Differences Between Breed Means in Crown-rump Measurements Adjusted for Curvilinear Regression105

LIST OF ILLUSTRATIONS.

<u>Figure</u>		<u>Page</u>
1	Diagrammatic Representation of Experimental Plan	11
2	The Onset of the Breeding Season	30
3	The Duration of Oestrus	49
4	The Length of the Oestrual Cycle	53
5	Growth of Curved Crown-rump Measurement . .	102
6	Growth of Straight Crown-rump Measurement .	103
