SOME ASPECTS

OF

GENE DOSAGE EFFECTS

IN

N-TYPE SHEEP.

Thesis submitted in part
fulfilment of the degree of
Master of Science.

SOME ASPECTS OF GENE DOSAGE EFFECTS IN

N-TYPE SHEEP.

T A B L E O F C O N T E N T S

<u>PART I.</u>	PAGE
Chapter I. General Introduction	1
Section I :- Dr. Dry's Experimental Romney Flock	1
Section II:- Goldschmidt's Theory of Gene Dosage Effects	5
Section III: Application of Gene Dosage Theory to N-type Sheep	7
Section IV:- Gradients over the Body.	9
Section V :- General.	9
 <u>PART II.</u>	
<u>FIBRE TYPE ARRAY WORK.</u>	
Chapter II. Introduction	11
Section I :- Description of Fibre Types	11
Section II:- Description of Fibre Type Arrays	15
Chapter III. Material and Method	19
Section I :- Sampling Positions	19
Section II:- Sampling Method	21
Section III: General	22
Chapter IV. Fibre Type Arrays and Gene Dosage	23
Section I :- Comparisons between Arrays Present in the same Position between Different Genotypes.	24
Section II:- Comparisons between Positions within Genotypes	27
Section III: Gradients of Different Genotypes.	38
Section VI:- Discussion and Conclusions	40
Chapter V. Comparisons between Individual Fibre Types, Between Positions, and Between Genotypes.	43
Section I :- Introduction	43
Section II:- Comparisons between Halo-hairs	43
Section III: Comparisons between Halo-hair' Fibres	47
Section IV:- Comparisons between Super-sickle A Fibres	47
Section V :- Comparisons between Super-sickle A' Fibres	49
Section VI:- Comparisons between Super-sickle B Fibres	50
Section VII: Comparisons between Fine Super-sickle B Fibres	52
Section VIII Comparisons between sickle-fibres	52
Section IX:- Comparisons between fine sickle-fibres	54

Section XIII :- Comparisons between Non-medulated Curly-tip Fibres	59
Section XIV :- Comparisons between Histerotrichs	60
Section XV :- Comparisons between Total Pre-curly-tips	62
Section XVI :- General Summary	64

Chapter VI. Unusual Arrays Found	68
--	----

Section I :- The array on the Withers of 80/47	68
Section II :- Arrays on sheep 178/48	69
Section III :- Other Arrays	70

Chapter VII. The Heterozygous Dominant-N Sheep of Leggs than N-grade Halo-hair Abundance and Variation in this Genotype	71
---	----

Section I :- Results	71
Section II :- Variation in the Heterozygous Dominant-N Genotype	72
Section III :- Discussion	75

Chapter VIII. The Precipice and Related Phenomena	78
---	----

Section I :- Results	78
Section II :- Discussion	83

Chapter IX. The Discriminant Function as Applied to Fibre Type Arrays	87
--	----

Section I :- Introduction	87
Section II :- The Discriminant Function	88
Section III :- Results	90
Section IV :- Discussion	92

PART III.

HAIRINESS AS MEASURED BY THE MEDULLOMETER.

Chapter X. Introduction	94
-----------------------------------	----

Chapter XI. Material and Method	95
---	----

Section I :- General Method	95
Section II :- Statistical Method	96

Chapter XII. Results	98
--------------------------------	----

Section I :- Between Genotype Analysis	98
Section II :- Differences between Positions within Genotypes	100
Section III :- Comparisons of Differences in Position between Genotypes	103
Section IV :- Conclusions	105

Chapter XIII. The Relationship between Hairiness as Measured by the Fibre Type Array Method and by the Medullometer	108
---	-----

Section I :- Comparisons between Genotypes	108
Section II :- Comparisons between Positions	109
Section III :- Individual Comparisons	110

Chapter XV. Materials and Method	116
Chapter XVI. Results	118

1
PART V.

GENERAL DISCUSSION AND SUMMARY.

Chapter XVII Discussion	121
Chapter XVIII Summary	130
