Collectivism versus individualism	
Holistic accounting	
<u>CHAPTER THREE: METHODOLOGY</u>	22
OVERVIEW OF METHODOLOGY	
PRELIMINARY INVESTIGATION	
LITERATURE REVIEW	
<u>THE FOCUS GROUP</u>	
Sampling Framework	
The interview	
Focus group prompt questions	
Summary of participant profile	
Outcome of focus group	
Categorisation of success factors	
<u>INTERVIEWS: THE INDEPTH INTERVIEWS AND</u>	
<u>RANKING EXERCISE</u>	
General	
Development of the in-depth interview	
Development of the ranking exercise	
Participants	
Outcome of interviews	
Analysis of in-depth interviews and ranking exercise	
<u>CHAPTER FOUR: RESEARCH FINDINGS</u>	48
<u>KEY FACTORS IDENTIFIED FROM INTERVIEWS</u>	
How is success judged?	
How is failure judged?	
Employment policies	

Housing policies
 Grants policies
 Dividends policies
 Forward planning
 Investment policies
 Profit
 Role in local authority matters
 Role in hapu affairs
 Contribution to social issues
 Summary of findings: In-depth interviews
RESULTS OF THE RANKING EXERCISE

Overview
 Ranking of factors: Overall
 Major factors identified from ranking exercise
 Other high ranking factors by sampling framework
 category
 Ranking Comparisons: Gender
 Ranking Comparisons: Age
 Ranking Comparisons: Living location
 Ranking Comparisons: Level of involvement
 Ranking Comparisons: Employment status
 Ranking Comparisons: Education status
 Findings Analysed by Framework Factor
 Summary of findings: Ranking exercise

CHAPTER FIVE: DISCUSSION AND ANALYSIS

92

General
 Cultural importance
 Financial considerations
 Operational factors
 Physical considerations
 Political involvement
 Social contribution
 Gender comparisons
 Age comparisons
 Living location comparisons
 Level of involvement comparisons
 Employment status comparisons
 Education status comparisons
 Revision of framework into six factors

CHAPTER SIX: CONCLUSIONS

111

Appendix three: Ranking exercise	125
Appendix four: Raw data in relation to ranking exercise	130
Appendix five: Level of ranking, from highest to lowest	132

ABSTRACT

This research report has looked at the question of how Maori land owners judge success. The study has focused on the management of Maori incorporations and has engaged 47 Maori people in the exercise. It attempted to establish Maori perspectives on what constitutes successful management and to develop a framework of factors to order and describe the judgement of landowners. This framework could then be used to compare management, and to give weighting to the factors identified as being most important to success.

The research findings have illustrated that the perspectives of Maori land owners in the Tai Tokerau can be described by a complex amalgam of factors. These factors include cultural, social, political, financial, physical, and operational concerns. Many of these concerns have the potential to be at variance with each other. The research has also revealed the many differences in thinking between various sub-groups of Maori land owners. The results suggest that successful management is likely to be about managing the tensions that arise between the different types of success Maori are seeking. Managing Maori land to meet the aspirations of success held by large numbers of owners is an increasingly complex matter.

The findings of this research contrast with the limited literature in relation to Maori land management and success. Most written material emphasises the importance of financial considerations, and relies heavily on western concepts and perspectives of business success in terms of profit, growth in share value, and dividends.

It is hoped that the findings will act as a stimulus for debate among Maori and lead to the identification of a series of key factors that contribute to success and failure. Unless those people managing Maori land have the necessary training and experience, management will not be successful. However, without knowledge of what Maori land owners consider to be successful management, training is not likely to be well designed and targeted. This research will enable strategies to be identified to ensure that Maori land managers and custodians have the best training and advice available to them to increase their chances of success in Maori terms.

How do Maori land owners judge whether the management of Maori incorporations is successful? : a 52.786 research report presented in partial fulfilment of the requirements of the degree of Master of Business Systems at Massey University
